PROFESSIONAL SUMMARY

UI/UX Software Engineer and Design Engineer with 4+ years of experience engineering accessible, high-performance web applications and design systems. Specialized in bridging product design and front-end engineering using React, TypeScript, Node.js, and modern UI frameworks. Experienced in owning the full interface lifecycle—from initial user research and Figma prototyping to component architecture, backend integration (Python/FastAPI), and cloud deployment. Modernizes developer workflows by integrating LLM tooling (Claude Code, Cursor, Azure OpenAI) to accelerate rapid prototyping, code hardening, and feature delivery.

SKILLS

Front-End & Architecture: React.js, TypeScript, JavaScript (ES6+), Angular, HTML5, CSS3, Tailwind CSS, Styled Components, Storybook, Design Tokens, Micro-frontends, Responsive Web Design

UI/UX & Design Systems: Figma, FigJam, Adobe XD, Wireframing, Interactive Prototyping, Usability Testing, User Journey Mapping, Design System Governance, Component Libraries

UI Frameworks & Styling: Chakra UI, Material UI (MUI), Design Token Pipelines, Tailwind CSS

Accessibility (a11y): WCAG 2.1 AA Standards, ARIA Specifications, Screen Reader Testing (NVDA, VoiceOver), axe DevTools

AI Tooling & LLM Integration: Claude Code, Cursor, Google AI Studio, Firebase Studio, Azure OpenAI SDK, Retrieval-Augmented Generation (RAG) UI Integration

State & Data Management: Redux Toolkit, Zustand, TanStack Query (React Query), RESTful APIs, GraphQL, tRPC

Backend, Cloud & Databases: Python, FastAPI, Django REST Framework, Node.js, Pydantic, PostgreSQL, MySQL, AWS (EC2, S3, Lambda, Amplify), Docker, Kubernetes

DevOps & Testing: Git, GitHub Actions, CI/CD Pipelines, PyTest, Jest, React Testing Library, Playwright, Postman

PROFESSIONAL EXPERIENCE

Cisco — *UI/UX Software Engineer / Design Engineer* **USA | Sep 2025 – Present**

- **Architected Reusable UI Infrastructure:** Led the design-to-code workflow by converting high-fidelity Figma components into a WCAG 2.1 AA-compliant React and TypeScript component library using Chakra UI and Material UI, standardizing design tokens across 3 enterprise web platforms.
- **Integrated Enterprise AI Workflows:** Engineered custom UI components powered by Azure OpenAI and FastAPI microservices for natural language search and document summarization, reducing average employee knowledge retrieval time by 25%.
- **Accelerated Feature Delivery with AI Tooling:** Embedded Claude Code, Cursor, and Google AI Studio into daily development workflows to rapid-prototype complex interactive flows and generate automated unit tests, shortening PR delivery cycles from 5 days to 3 days.
- **Optimized API & Backend Services:** Developed asynchronous FastAPI endpoints using Pydantic schema validation and optimized PostgreSQL queries, handling 1200+ monthly operational queries with a 30% reduction in response latency.
- **Strengthened Code Quality & Accessibility:** Configured automated accessibility testing in CI/CD pipelines using axe DevTools, Jest, and GitHub Actions, resolving 100% of critical ARIA violations and reducing post-release regression bugs by 20%.

Wipro — *UI/UX Software Engineer* **India | Feb 2021 – Jul 2024**

- **Spearheaded User Research & Prototyping:** Conducted 20+ user interviews and usability testing sessions to translate complex business requirements into high-fidelity interactive prototypes in Figma and Adobe XD.
- **Engineered Modular Front-End Architectures:** Developed accessible, responsive React.js and TypeScript web applications using Tailwind CSS and Storybook, ensuring strict visual alignment with cross-functional product specs.
- **Built Secure Full-Stack Integrations:** Developed Django REST Framework and Node.js microservices with JWT/OAuth2 authentication pipelines, securely processing 1,000+ daily user transactions.
- **Driven UI Optimization via Analytics:** Embedded SAS and Looker Studio tracking hooks into key UI interaction points, synthesizing user drop-off data to redesign application flows and increase checkout completion rates by 14%.
- **Managed Cloud Deployments & QA Automation:** Orchestrated continuous integration pipelines on AWS (EC2, S3, Lambda, Amplify) and engineered end-to-end automated test suites in Selenium and PyTest, reducing recurring staging bugs by 15%.

PROJECTS

AI-Powered Enterprise Service Portal **React, TypeScript, FastAPI, Azure OpenAI, Chakra UI, Figma**

- Designed end-to-end user journeys and Figma wireframes for enterprise knowledge workflows, validating interactive prototypes through user testing before writing production code.
- Built full-stack interface utilizing React, TypeScript, and FastAPI backends, integrating Azure OpenAI embeddings for instant document search and request routing.
- Integrated Looker Studio telemetry to monitor user friction points, improving search navigation efficiency by 18%.

E-Commerce Customer Experience Platform **React, Django, PostgreSQL, AWS Amplify, Material UI**

- Created multi-step checkout user flows and interactive prototypes in Figma, translating them into responsive React frontend components.
- Integrated Django REST Framework APIs for real-time inventory management, order tracking, and dynamic notification dispatch.

EDUCATION

Master of Science in Information Systems **May 2026**

University of Maryland, Baltimore County (UMBC) | Baltimore, MD
